Announces Initiation of Quarterly Cash Dividend on Common Stock

PR Newswire

BIRMINGHAM, Ala.

BIRMINGHAM, Ala., July 25, 2013 [/PRNewswire/](#) -- HealthSouth Corporation (NYSE: HLS), the nation's largest owner and operator of inpatient rehabilitation hospitals, today reported its results of operations for the second quarter ended June 30, 2013.

"We are very pleased with the results of the second quarter," said Jay Grinney, President and Chief Executive Officer of HealthSouth. "Net operating revenues grew 5.8% quarter over quarter on strong demand for our services while disciplined expense management resulted in a 7.5% increase in Adjusted EBITDA despite sequestration headwinds. We also continued to grow our portfolio of industry-leading hospitals with the opening of new hospitals in Littleton, Colorado and Stuart, Florida; the latter is a joint venture with Martin Health System. Importantly, our board of directors approved the initiation of a quarterly cash dividend. This action underscores our confidence in the sustainability of our business model and growth agenda while rewarding existing shareholders and providing an incentive for new shareholders to own our stock."

Second Quarter Results

- Consolidated net operating revenues were \$564.5 million for the second quarter of 2013 compared to \$533.4 million for the second quarter of 2012, or an increase of 5.8%. This increase was attributable to a 6.3% increase in patient discharges and a 0.3% increase in net patient revenue per discharge. Discharge growth included a 3.3% increase in same-store discharges. Same-store discharges in the second quarter of 2013 were negatively impacted by the closure of 41 skilled nursing facility beds at two of the Company's hospitals in the first quarter of 2013. Approximately 130 basis points of discharge growth from new stores resulted from the consolidation of St. Vincent Rehabilitation Hospital beginning in the third quarter of 2012. The increase in net patient revenue per discharge resulted from Medicare and managed care price adjustments, higher patient acuity, and a higher percentage of Medicare patients. Net patient revenue per discharge was negatively impacted in the second quarter of 2013 by sequestration and the ramping up of operations at three new hospitals. New hospitals are required to treat a minimum of 30 patients for zero revenue as part of the Medicare certification process.
- Income from continuing operations attributable to HealthSouth per diluted share for the second quarter of 2013 was \$1.66 per share compared to \$0.39 per share for the same period of 2012. Earnings per share for the second quarter of 2013 included strong operating results, an income tax benefit of \$1.15 per diluted share associated with a settlement with the IRS, and a lower share count. In April 2013, the Company entered into closing agreements with the IRS that settled income tax matters related to the previous restatement of its 2000 and 2001 financial statements, as well as certain other tax matters, through December 31, 2008 and resulted in an approximate \$283 million increase in the Company's gross federal net operating loss. The lower share count in 2013 resulted from the Company's repurchase of approximately 9.1 million shares of its common stock in the first quarter of 2013.
- Cash flows provided by operating activities were \$226.8 million for the six months ended June 30, 2013 compared to \$195.0 million for the same period of 2012. This increase was primarily due to increased net operating revenues and continued disciplined expense management.
- Adjusted EBITDA (see attached supplemental information) for the three months ended June 30, 2013 was \$134.5 million compared to \$125.1 million for the three months ended June 30, 2012, or an increase of 7.5%. This improvement was due primarily to continued revenue growth and disciplined expense management. Sequestration negatively impacted Adjusted EBITDA by approximately \$8 million during the second quarter of 2013.
- Adjusted free cash flow (see attached supplemental information) for the three months ended June 30, 2013 was \$72.5 million compared to \$70.0 million for the same period of 2012. Adjusted free cash flow for the second quarter of 2013 benefited from higher Adjusted EBITDA and the timing of maintenance capital expenditures offset by the timing of interest payments.

"Our Company's ability to grow Adjusted EBITDA by 7.5% in the quarter in spite of sequestration is further evidence of the strength of our business model," said Doug Coltharp, Executive Vice President and Chief

Financial Officer of HealthSouth. "Further, we continue to translate a high percentage of Adjusted EBITDA into adjusted free cash flow, enhancing our flexibility to pursue an array of shareholder value creating strategies."

Initiation of Quarterly Cash Dividend on Common Stock

On July 25, 2013, the Company's board of directors approved the initiation of a quarterly cash dividend on its common stock of \$0.18 per share, representing \$0.72 per share annually. The first quarterly dividend has been declared and will be payable on or about October 15, 2013 to stockholders of record as of the close of business on October 1, 2013. The Company expects quarterly dividends to be paid in January, April, July, and October. However, the actual declaration of any future cash dividends, and the establishment of record and payment dates, will be subject to final approval by the Company's board of directors each quarter after consideration of various factors, including the Company's capital position and the best interests of its stockholders. Cash dividends are expected to be funded using cash flows from operations, cash on hand, and availability under the Company's revolving credit facility.

2013 Guidance

Based on its results for the first half of 2013, including the impact of the income tax benefit discussed above, the Company is:

- raising its full-year 2013 Adjusted EBITDA guidance to a range of \$520 million to \$530 million from a range of \$506 million to \$516 million.
- raising its full-year 2013 guidance for income from continuing operations attributable to HealthSouth per share to \$2.87 to \$2.93 per diluted share from \$1.61 to \$1.68 per basic share.

Such forward-looking statements are necessarily estimates based upon current information, involve a number of risks and uncertainties, and relate to, among other things, future events, HealthSouth's plan to repurchase its debt or equity securities, dividend strategies, effective income tax rates, HealthSouth's business strategy, its financial plans, its future financial performance, or its projected business results or model, or its projected capital expenditures, or its leverage ratio. Actual events or results may differ materially from those anticipated in these forward-looking statements as a result of a variety of factors. While it is impossible to identify all such factors, factors which could cause actual events or results to differ materially from those estimated by HealthSouth include, but are not limited to, any adverse outcome of various lawsuits, claims, and legal or regulatory proceedings involving HealthSouth, including its pending HHS-OIG investigations; potential disruptions, breaches, or other incidents affecting the proper operation, availability, or security of HealthSouth's information systems; significant changes in HealthSouth's management team; HealthSouth's ability to successfully complete and integrate de novo developments, acquisitions, investments, and joint ventures consistent with its growth strategy; changes, delays in (including in connection with resolution of Medicare payment reviews or appeals), or suspension of reimbursement for HealthSouth's services by governmental or private payors; changes in the regulation of the healthcare industry at either or both of the federal and state levels, including as part of national healthcare reform and deficit reduction; competitive pressures in the healthcare industry and HealthSouth's response thereto; HealthSouth's ability to obtain and retain favorable arrangements with third-party payors; HealthSouth's ability to attract and retain nurses, therapists, and other healthcare professionals in a highly competitive environment with often severe staffing shortages and the impact on HealthSouth's labor expenses from potential union activity and staffing shortages; general conditions in the economy and capital markets; the increase in the costs of defending and insuring against alleged professional liability claims and HealthSouth's ability to predict the estimated costs related to such claims; and other factors which may be identified from time to time in HealthSouth's SEC filings and other public announcements, including HealthSouth's Form 10-K for the year ended December 31, 2012 and Form 10-Q for the quarters ended March 31, 2013, and June 30, 2013, when filed.
